SUMMARY

Product professional with 4+ years of experience shipping products in a highly regulated financial institution serving 25M+ users. Experienced in solving complex product problems, shipping cross-platform products and driving outcomes at scale. I am now looking to bring that rigor into a fast product environment where I can work closer to customers, identify high-value problems, test assumptions and own discovery to delivery.

WORK EXPERIENCE

Product Owner, Morgan Stanley

Jan 2025 – Present | Client Onboarding and Demographics fleet for US Wealth Management businesses

- **I**dentified fragmented login and enrollment as a top friction point across platforms. Led end-to-end delivery of **unified client experience** through **one-click SSO** and synchronized T&C acceptance for **300k+ users**.
- Shipped **manual account aggregation** enabling clients to consolidate their full financial picture for advisor planning. **Surfaced ~$500M** in held-away assets to FAs within 3 months, creating a pipeline for asset to MS.
- Enabled in-app **Fiserv payment enrollment** for ETrade clients, eliminating app switching from enrollment journey
- Led integration of mortgage records to distributed systems into a **unified single KYC** profile - consolidated fragmented data, improving cross-product onboarding experience and reducing financial advisor lookup friction.
- Identified an internal workflow gap and **independently built** a lightweight screen capture and annotation tool for Product, improving communication of requirements with engineering and design.
- Engaged with Financial Advisors (Home Office) and Risk, Compliance, and Legal stakeholders to **discover onboarding friction** points and translate regulatory constraints into clear, actionable product requirements
- Owned and maintained squad **product roadmap** to align stakeholders, driving leadership updates on progress.
- Defined product metrics with fleet POs and shipped a **90+ metric Client Onboarding KPI dashboard** on Tableau giving business units their first consolidated funnel view and enabled data backed prioritization across the fleet

Business Analyst, Morgan Stanley

Jun 2022 – Dec 2024 | Transaction Reporting Team - owned end-to-end delivery for OTC derivatives reporting.

- Spotted RTB team's manual reporting bottleneck; **scoped and shipped** Alteryx workflow saving 2,000 hrs/year.
- Self-built automation product with no tooling budget; **50% efficiency** gain, won **Spotlight Award**.
- Owned regulatory **product go-live end-to-end**: authored specs, defined acceptance criteria, shipped on time.
- Diagnosed Swaption failure root cause via data analysis; redesigned logic **lifting acceptance to ~98%**.

PROJECTS

Max — AI Calendar Assistant Link

Oct 2023 | Sole Product Manager & builder using Streamlit, Claude Code, Google Calendar API, OAuth 2.0

- **Identified an unaddressed gap in Android calendar UX** through user research before Gemini announced AI-native Calendar integration for context-switching between chat/mail and calendar as a high-frequency pain point.
- **Shipped a working Prototype in 2 weeks** owning every layer end-to-end: product scoping, UX flow, OAuth integration, Calendar API wiring, and NLP intent routing — zero engineering team, zero budget, zero playbook.

Product In-charge, Orangepod

Sep 2021 – Apr 2022 | Early stage digital marketing startup

- **Streamlined product delivery** including onboarding, client engagement and design alignment
- Steered customer service leading to an **87% reduction in customer complaints** within 3 months

EDUCATION & CERTIFICATIONS

- AI Product Strategy & Build Lab by Curious PM | Aug 2025 - Nov 2025
- Product Discovery and Product Analytics by Product School | Sep 2024
- **Bachelor of Science (Physics),** Mithibai College (University of Mumbai) | Jun 2019 – Apr 2022
- **Tools:** Jira, Figma, REST APIs, OAuth 2.0, Webhooks, Claude Code, Antigravity, Cursor, SQL, Distributed systems
