Product professional with 4+ years of experience shipping products in a highly regulated financial institution serving 25M+ users. Experienced in solving complex product problems, shipping cross-platform products, and driving outcomes at scale. I am now looking to bring that rigor into a faster product environment where I can work closer to customers, identify high-value problems, test assumptions quickly, and own products from discovery through measurable outcomes.

WORK EXPERIENCE

Product Owner, Morgan Stanley — Jan 2025 - Present

Product Owner for Client Onboarding and Demographics fleet for US Wealth Management businesses

- **Unified cross-platform client experience**: Identified fragmented login and enrollment as a top friction point across platforms; led end-to-end delivery of seamless **one-click SSO** and **synchronized T&C acceptance** for **8M+ users**.
- Shipped **manual account aggregation** enabling clients to consolidate their full financial picture for advisor planning - **surfaced ~$500M** in held-away assets to FAs within 3 months, creating a pipeline for asset consolidation to MS.
- Enabled in-app **Fiserv payment enrollment** for ETrade clients, eliminating app switching from the enrollment journey
- Led integration of mortgage records to distributed systems into a **unified single KYC** profile - consolidated fragmented data, improving cross-product onboarding experience and reducing financial advisor lookup friction.
- Identified an internal workflow gap and **independently built** a lightweight screen capture and annotation tool for Product, improving communication of requirements with engineering and design.
- Defined product metrics with fleet POs and shipped a **90+ metric Client Onboarding KPI dashboard** on Tableau giving business units their first consolidated funnel view and enabled data backed prioritization across the fleet

Business Analyst, Morgan Stanley — Jun 2022 - Dec 2024

Business Analyst in Transaction Reporting Team - owned end-to-end delivery for OTC derivatives reporting.

- Spotted RTB team's manual reporting bottleneck; **scoped and shipped** Alteryx workflow saving 2,000 hrs/year.
- Self-built automation product with no tooling budget; **50% efficiency** gain, won **Spotlight Award**.
- Owned regulatory **product go-live end-to-end**: authored specs, defined acceptance criteria, shipped on time.
- Diagnosed Swaption failure root cause via data analysis; redesigned logic **lifting acceptance to ~98%.**

PROJECTS

Max - AI Calendar Assistant (Lin)

Sole Product Manager & builder · Streamlit, Claude Code, Google Calendar API, OAuth 2.0

- **Identified an unaddressed gap in Android calendar UX** through structured user research before Gemini announced AI-native Calendar integration for context-switching between chat/mail and calendar as a high-frequency pain point.
- **Shipped a working MVP solo in under 2 weeks** owning every layer end-to-end: product scoping, UX flow, OAuth integration, Calendar API wiring, and NLP intent routing — zero engineering team, zero budget, zero playbook.
- **Iterating** on NLP accuracy and edge-case handling as a skill-building exercise in AI product development.

Operations In-charge, Orangepod — Sep 2021 - Apr 2022

Early stage digital marketing startup - Web Development & Instagram Marketing services for local businesses

- **Streamlined product delivery** including onboarding, client engagement and design alignment
- Steered customer service leading to an **87% reduction in customer complaints within 3 months**
- **Assisted the founding team** in delegating tasks & developing a high-impact sales pitch closing 5 clients

SKILLS & TOOLS

- **Product:** Requirements & acceptance criteria, product delivery, UAT, cross-functional stakeholder management
- **Fintech:** Client onboarding, wealth management, KYC, payments, regulatory reporting, OTC derivatives
- **Tools:** Jira, Figma, REST APIs, OAuth 2.0, Tableau/Power BI, Alteryx, Advanced Excel, Claude Code, Antigravity

CERTIFICATIONS

- **AI Product Strategy & Build Lab** by Curious PM to build AI apps from concept to deployment
- **Product Discovery** by Product School for user research and customer validation techniques
- **Product Analytics** by Product School for data driven Product metrics analysis
